

# AI Interviewer Master Plan

## Objective

Build an AI interviewer for IT roles with company-specific interviews, resume analysis, English assessment, personalized roadmap, and progress tracking.

## Core Features

Company knowledge, RAG, adaptive interviews, ATS resume scoring, coding evaluation, English evaluation, memory, analytics dashboard.

## Architecture

Frontend: React/Next.js. Backend: FastAPI. Database: PostgreSQL. Vector DB: ChromaDB or FAISS. Embeddings: BGE/Nomic. Models: GPT/Codex, Qwen/Llama, DeepSeek.

## Datasets

Company profiles, interview questions, accepted/rejected resumes, HR and behavioral questions, English assessment data.

## Agents

Company Agent, Resume Agent, Interview Agent, English Agent, Roadmap Agent, Feedback Agent, Dataset Agent.

## Recommendation

Avoid laptop fine-tuning. Invest effort in datasets, embeddings, RAG, and evaluation pipelines.
