## SUMMARY

---

Motivated Blockchain Developer with a strong foundation in Web3 technologies, Ethereum, Solidity, and decentralized application (dApp) development. Passionate about building secure, efficient, and scalable blockchain solutions. Experienced with smart contract development, wallet integration, and modern full-stack technologies including React, Node.js, and TypeScript. Quick learner with strong problem-solving skills and a keen interest in decentralized finance (DeFi), NFTs, and blockchain infrastructure.

## EDUCATION

---

### University Name

Bachelor of Computer Applications (BCA)

2023 – 2026

## PROJECTS

---

### Decentralized Voting System

- Designed and deployed Ethereum smart contracts using Solidity.
- Integrated MetaMask for secure wallet authentication.
- Built a responsive React-based user interface.
- Ensured transparent and tamper-proof voting.

### NFT Marketplace

- Developed ERC-721 NFT smart contracts.
- Stored NFT metadata using IPFS.
- Connected blockchain transactions through Ethers.js.
- Implemented NFT minting, buying, and selling functionality.

### DeFi Staking Platform

- Built staking and reward distribution smart contracts.
- Reduced gas consumption through contract optimization.
- Integrated wallet connection and transaction tracking.
