 ALI AHMAD RAZA SHEIKH

I build clean, responsive and functional websites using both frontend and backend technologies. I enjoy solving problems, improving logic, and working on projects that help me grow as a developer. I'm comfortable with HTML, CSS, JavaScript, React, Python and Django, and I have experience working with databases, SEO basics and office tools. I'm currently pursuing BCA and looking for opportunities to learn, contribute and grow.

SKILLS

- FrontEnd- Html ,Css, Javascript, Bootstrap,jQuery,React.js,Htmx, AlpineJS, Tailwind CSS ,vite.
- Backend- Python, Django, websocket,Redis .
- other skills/tools- Postman, SEO, Git & GitHub.
- AI - Gemini API, Prompt Engineering.
- DataBase - PostgreSQL, SQLite, Supabase.

Education

Bachler in Computer Application

Goverment Holker Science College , Indore

2024- Expected 2027

PROJECT

1. Iconic Style – Clothing Brand Website

Built a full-stack clothing brand website where users can browse, filter and purchase products.

- **Frontend:** HTML, CSS, JavaScript, Bootstrap for clean UI and responsive design
- **Backend:** Django for product management, user accounts, cart, orders and admin panel
- **Features:** Category filtering, secure authentication, product CRUD, simple checkout flow

2. Talkzone real-time chat application

TalkZone is a real-time chat web application built using Django, Django Channels, and WebSockets. It supports private and group messaging, an AI-powered chatbot (Groq LLaMA), file sharing, emoji reactions, friend requests, and user profiles. The application is deployed on Render, using PostgreSQL for the database and Cloudinary for media storage

- **Languages & Technologies:** Python , Django,JavaScript, HTML + Tailwind CSS ,SQL (SQLite).
- **Key Technologies:** WebSockets (Django Channels) ,HTMX ,AlpineJS ,Redis ,Cloudinary ,Django Allauth.

4. **Personal Portfolio Website**

Developed a dynamic and fully responsive personal portfolio website to professionally showcase academic projects, freelancing work, and 3D modeling designs. The application features a modern, interactive user interface with custom scroll animations, dynamic routing for seamless single-page navigation, and an optimized architecture that ensures fast load times and a premium user experience.

- Frontend: React.js, JavaScript (JSX)
- Styling: Tailwind CSS
- Build Tool: Vite
- Backend/Database: Supabase
