ALI AHMAD RAZA SHEIKH

PROFILE SUMMARY

I build clean, responsive and functional websites using both frontend and backend technologies. I enjoy solving problems, improving logic, and working on extra period that help me grow as a developer. I'm comfortable with HTML, CSS, JavaScript, React, Python and Django, and I have experience working with databases, SEO basics and office tools. I'm currently pursuing BCA and looking for opportunities to learn, contribute and grow.

PROJECT

1. Iconic Style – Clothing Brand Website (Full-Stack)

Built a full-stack clothing brand website where users can browse, filter and purchase products.

- Frontend: HTML, CSS, JavaScript, Bootstrap for clean UI and responsive design
- Backend: Django for product management, user accounts, cart, orders and admin panel
- Features: Category filtering, secure authentication, product CRUD, simple checkout flow

2. Architect Portfolio Website:-

Developed a modern and minimal portfolio website for an architect to showcase his extra period.

- Built with HTML, CSS, JavaScript and Bootstrap
- Includes project gallery, profile section and responsive layouts
- Designed to highlight work with a clean and professional look
- Link: <https://smfaizanpotfolio.gamer.gd/>
