Attended Government holker science college
Indore, Madhya Pradesh, India

Summary

I'm a BCA student and budding Full Stack Developer who enjoys turning ideas into working websites and applications. I work with HTML, CSS, JavaScript, React.js, Python, and Django to build responsive and smooth user experiences.

I've created projects like a full-stack clothing brand website and an architect portfolio site, which helped me improve my logic building, problem-solving, and ability to plan features in a structured way.

I'm comfortable with SQL, SEO basics, Git & GitHub, and tools like MS Excel, Word, PowerPoint, Google Sheets, Tally ERP9, and Postman.

I like learning new things, exploring better ways to solve problems, and building products that feel simple and useful. My goal is to grow as a developer and work on real-world applications that make an impact.

If you're working on something interesting or have opportunities to collaborate, I'd be happy to connect.

Experience

Freelance

Web Developer

August 2025 - Present (11 months)

Indore, Madhya Pradesh, India

Education

Govt. Holkar Science College A.B. Road, Indore

Bachelor of computer application · (July 2024 - July 2027)
